| • CSS3 | • NodeJS | • Agile | • AWS |

PROJECTS

Agile Chess App [Github](#) [Demo](#)

- Fully functional chess app built using continuous integration
- Collaborated with a team of four team members
- Led daily standups as Scrum Master
- Held weekly Agile team meetings to plan the next sprint and review code under the guidance of a senior software engineer

Streaming Project [Github](#) [API code](#)

- Fully functional application that streams by connecting to Open Broadcaster Software (OBS)
- Developed using React and Redux to control state using lifecycle methods and reducers
- Constructed a JSON API to keep track of user information and connect users to their streams

Bamboo [Github](#) [Demo](#)

- An E-commerce site that allows students to create video courses and sell them
- Engineered the backend to give different permissions to teachers and students
- Utilizes packages like Devise to authenticate users and Stripe to validate payments
- AJAX to arrange sections and lessons by dragging and dropping

EDUCATION

University of California, Berkeley Extension

Full Stack Web Development Bootcamp
